

Latécoère wins contract to produce Rolls-Royce's Pearl 15 engine harnesses

Toulouse, 16 January 2019 – Latécoère, a tier 1 partner to major international aircraft manufacturers, announces the signing of a new contract worth close to \$8 million, for the production of engine harnesses for Rolls-Royce.

This order will enable Latécoère to obtain the SABRe (Supplier Management System Requirements) certification from 2019. The Group will then be included in Rolls-Royce's list of trusted suppliers. The harnesses produced will equip the new generation Pearl 15 engines, reserved primarily for Bombardier's new Global 5500 and 6500 business jets.

This build-to-print production will use semi-automatic overbraiding machines. It will be managed by the Latécoère Interconnection Systems teams at the Labège and Liposthey sites from mid-2019 and will then be transferred in 2020 to the Group's "best cost" zone. Deliveries will continue until 2024.

Denis Bretagnolle, Director of Latécoère Interconnection Systems, asserted: *"This success is the result of the continued efforts of our teams to offer competitive bids, at the forefront of technological innovation, on products operating within a harsh environment. Our Interconnection Systems business line once again proves its dynamism and its ability to conquer new markets"*.
