Market update

Latecoere's half-year 2024 revenue reaches €349.2m as the business continues to ramp-up production to support customer demand, an increase of €45.4m or +14.9% over the prior year. Thanks to this growth and despite continuing inflationary pressures, a challenging global supply chain and a significant fire incident at one of our plants in Mexico in February, recurring EBITDA is brought closer to break even.

Latecoere asked for further postponement of its Annual General Meeting. The Toulouse Commercial Court has granted this postponement until 31 December 2024.

Further communication will follow in due time.
